

# LexisNexis® TotalPatent™

Search the largest online collection  
of enhanced first-level patent data

# TotalPatent

When it comes to innovation and protection of intellectual property, you need a resource that provides you with the most comprehensive and relevant, yet easy-to-use, patent research and retrieval system available anywhere.

With global patent filing, patent infringement and patent licensing activities at all-time highs, count on LexisNexis® to help protect valuable assets.

TotalPatent™ allows you to access extensive LexisNexis® patent databases, including the full text from 22 authorities, bibliographic and abstract data from 96 authorities, searchable both in the language of publication and in English language machine translations, as well as images, legal status, citations and patent family data and compressed and searchable PDFs.

With more than 38 million main patent families—more than five million full text records than any other provider—TotalPatent offers access to the most comprehensive, searchable, online collection of first-level patent information in the world.

In addition, index terms have been applied to virtually every field in the TotalPatent database. The combination of unmatched content and the thorough indexing allow you to create detailed searches that were previously available only on databases with “expert search tools.”

The screenshot displays the LexisNexis TotalPatent search interface. At the top, there are navigation tabs: Search, Document Retrieval, History & Alerts, and Work Folders. The main search area is titled 'Guided Search' and includes a 'Search Within' dropdown set to 'Full Text (incl. Biblio.)'. Below this is a large text input field for search terms, with a 'Search' button and a 'Reset form' link. A 'Syntax Converter' link is also present. An example search string is provided: 'e.g., (plastic OR rubber OR acrylic) AND (pump OR inflat)'. There is a 'View Connectors Help' link. Below the search terms field, there is a checkbox for 'Display hit count only'. The 'Publication Date' section has a dropdown menu set to 'All available dates'. The 'Restrictions' section has two 'Select Field' dropdown menus, with an example: 'e.g., LexisNexis OR Reed Elsevier'. The 'Authorities' section is expanded to show 'Major Full Text' with checkboxes for 'All major full text authorities' and 'US', 'EP', 'JP', 'DE', 'FR', 'GB'. There are also checkboxes for 'Other Full Text' and 'Bibliographic Only'. On the right side, there are several utility sections: 'Get a Document' with radio buttons for 'Full Text', 'Family Info', and 'PDF', and a 'Publication Number' input field; 'Look Up Assignee or Inventor' with radio buttons for 'Assignee' and 'Inventor'; 'Find Subsidiary Companies'; and 'External Classifications' with expandable sections for 'IPC', 'US Class', and 'ECLA'. At the bottom right, there is a 'How Do I...?' section with a link for 'Find coverage information (publication types, dates, etc.) for each authority?'.

## With TotalPatent, you can:

Search using forms—guided and advanced—to help you with critical patent prior art research, patent prosecution, researching infringements, identification of licensing opportunities or R&D.

- Retrieve specific patents quickly and easily by patent number.
- Download fast—with the ability to export patent data into Microsoft® Excel® spreadsheets.
- Set your options to the way you work—using enhanced flexibility and functionality.
- Integrate seamlessly into your workflow—TotalPatent easily complements other LexisNexis products, such as the LexisNexis® Patent Research Tasks page, the REEDFAX® service, LexisNexis® PatentOptimizer™ software, CourtLink® and more.
- Structure work folders—save, organize, annotate and share personalized lists of patents.
- Download in bulk and export key bibliographic fields quickly.
- Utilize analytics tools to create graphical maps and bar charts online quickly, as well as allowing offline analysis of results with 3D graphs and charts.
- Enhance the speed and depth of your patent research with the LexisNexis Toolbar to immediately launch a search directly from TotalPatent to case law, non-patent prior art sources, current news, and other sources on *lexis.com*®.

The TotalPatent service gives you access to a comprehensive collection of patent information through a single platform that combines first-level data coverage with user-friendly design and powerful search functionality. Only TotalPatent combines extensive full text content from all the leading patent issuing authorities as well as most of the smaller ones to keep you updated faster than other services. You are relying on the most current patent information!
